News Release

New databook details industry's largest range of DC/DC converters from a single manufacturer

Murata Power Solutions has introduced its new DC/DC converter databook. The 36-page colour catalogue provides technical data on the company's extensive offering of isolated, point-of-load (POL), bus converter, processor support and memory support DC/DC converters.

Murata Power Solutions is currently the world's leading supplier of DC/DC converters with the largest range of any single manufacturer. It is also one of the

top five largest suppliers of power electronics overall. The company is able to provide solutions across the entire power spectrum.

The new databook features quick selection guides to help design engineers quickly identify the most suitable DC/DC converter for their given application. The steps are: select the product category required, find the output voltage needed from the data tables, choose a suitable product series using comprehensive information shown, and then if required, download the full data sheet from www.murata-ps.com.

In addition to a wide variety of industry-standard configurations, Murata Power Solutions also offers modified-standard DC/DC converters and a custom design service.

The new catalogue can be requested via the Murata Power Solutions website or downloaded as a PDF at <http://www.murata-ps.com/dcdc-catalog>

About Murata Power Solutions

Murata Power Solutions (www.murata-ps.com), is headquartered in Mansfield, Massachusetts, with over 1,300 employees, and locations in the USA, Canada, England, France, Germany, Japan and China. Murata Power Solutions designs, manufactures and distributes DC/DC Converters, AC/DC Power Supplies, Magnetics, Data Acquisition devices and Panel Meters, and offers these products in custom, standard and modified-standard variations. These products, which are built to exacting requirements in ISO9000:2000-approved facilities, are typically used worldwide within telecommunications, computing, industrial and other high-tech applications.

About Murata

Based in Kyoto Japan, Murata Manufacturing Company Ltd is one of the world's leading providers of ceramic based components, sensors, and AC/DC and DC/DC power solutions. Founded in 1950, the company has over 26,000 employees worldwide, and over \$4.9 billion US in consolidated annual sales (as of March 31, 2007). Everywhere in the world, wherever you can reach, Murata's electronic components are always at work.
