

PRODUCT OBSOLESCENCE NOTICE

September 20, 2012

Dear Customer,

Murata Power Solutions hereby gives official notification that the products listed in this Notice are being rendered Obsolete.

We are offering Last Time Buy (LTB) opportunities and will accept orders for purchase of the affected parts through the specified scheduled dates.

In addition to our standard terms and conditions of sale, last time buys will be subject to the following restrictions:

- MOQ/MULT (Minimum Order Quantity/Multiples) may apply.
- Orders will be NC/NR (Non-Cancelable, Non-Returnable).
 - Once placed, LTB orders cannot be cancelled, rescheduled, or returned for non-quality reasons. Quality issues need to be identified and communicated within 30 days of shipment.
- Multiple releases against orders will be permitted with the constraint that no releases may be scheduled past the indicated dates for each product.
- Lead-times will be confirmed on an item-by-item basis.
- Murata Power Solutions reserves the right to close orders short by up to 10% of the order quantity to preclude additional manufacturing setups that might otherwise be necessary to complete the orders.
- Requests for an extension beyond the LTB dates will be reviewed on a case by case basis, but must be submitted before the LTB date

Where possible, we have identified recommended replacements based on the *best available* and closest substitute from our active product line. The recommended alternate may not be the best for all applications as specific physical or performance parameters may be more critical than others in a particular application. For this reason, it is recommended that you speak with our local sales representative to determine if another model may be more appropriate. **For any application, the recommended substitutes must be tested and qualified in the application.**

If you require further information please contact your local [Sales Representative](#).
